

August 12-13, 2016

**Medicine
of Cycling™**

International Bicycle Fitting Symposium

Join us for the 2016 premier cycling analysis and bicycle fitting symposium in the United States

why

Whether you are a shop fitter or a medical professional — watch, listen and learn break through concepts in bike fit. Improve the quality of your work with lectures and hands on instructional presentations. No other symposium gives you this kind of access to the best

topics

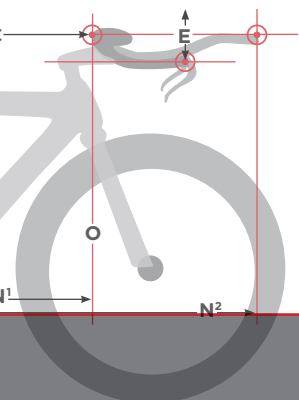

ABC's of fitting – the basic tools and angles
Evaluation and interventions around the lumbar spine and pelvis
A Team approach to helping the cyclist – MD, PT, Fitter (Grand Rounds)

Lectures from the fitters who have worked with world tour teams
Andy Pruitt, Ed.D. – Facilitator led case studies
John Cobb – Crank length as a fit variable for efficiency and aerodynamics
Happy Freedman – Foot evaluation and interventions
Curtis Cramblett, PT, CFMT – Finding and focussing a fit around primary drivers

*Happy Freedman – bike fitter and cycling coach on staff in Rehabilitation Prosthetics and Orthotics Lab at Hospital for Special Surgery, NYC
Co-chair bicycle fitting conference*

This is a star-packed lineup!
